

to whom it concerns NABs petition 04-160 is a dumb deal. as a over the road trucker, wyo. native rancher, member of the wy.converse county rural fire fires ass. i find the xm sat. to be a very useful tool. when trucking,i can keep informed of up coming , sevre storms,i have a portabile unit that i can take with me in the fire units to keep informed of changing wheather, it is also useful in the winter to comute from the ranch to douglas for supplys. it also gives us uninteroupted intertanmint when on rec. outings . its a service that i have paid in last two years an have paid for in advance for the next three years. i feel that the FCC should waste time on inproving there nat. wheather service instadade of trying to help the AM/FM INDUSTRIES recover there lost revnues.. thank you
